

# DOMINATOR

**Want to achieve stable high yields?**

**With good maturity?**

**Have you got good maize growing land?**

**YOU NEED DOMINATOR:**

-  **Very high yields of dry matter**
-  **Very good cob ripeness from large cobs**
-  **Consistent on farm performance**
-  **Suitable for silage, crimping and plastic**
-  **Superb lodging resistance**

**Grainseed Ltd**

# DOMINATOR

## STABLE PERFORMANCE OF YIELD WITH MATURITY

### Cob Ripeness

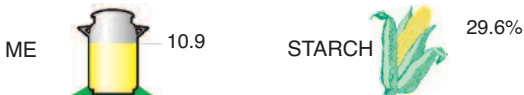

Extremely good cob ripeness for its maturity group. Above average number of grains per cob, 15% more than average. Cob ripening days after Picker + 9

### Maturity Group

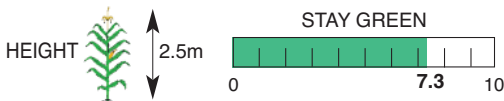

Matures similar to a number of Group 8 varieties due to good cob ripeness. Suitable for a wide range of growers. Dominator shows the same early maturity when grown under plastic.

### Quality & Digestibility

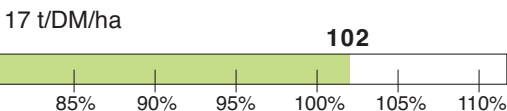

High ME yields of 186,000 MJ/ha and good starch yield of 5.0t/ha from well filled mature cobs at harvest.

### Plant Description

Very even single cross with prostrate leaves giving a good canopy. Big strong plant that retains green leaf until ready to harvest – chops and ensiles well.

### Yield

Sow at 45,000 seeds per acre | 111,000 seeds per hectare  
On good sites the best you can get. Massive crops from strong plants.
