period**
-  **Exceptional disease resistance**
-  **Limited seed availability**

Grainseed Ltd

NEW

ES METRONOM

HIGH YIELDING HIGHLY DIGESTIBLE FEED

Cob Ripeness

Very good cob ripeness for maturity group. Potential for huge yields on the right land.

Cob ripening days after Picker + 25.

Maturity Group

Later maturing variety that makes full use of growing season to boost production. Suitable for the best maize regions.

Quality & Digestibility

ME

STARCH

Currently under NIAB testing.

Plant Description

Tall erect wide leaves on a strong plant. Erect blocky cobs held close to the plant.

Yield

21.0t/DM/ha

105%*

* NIAB 3rd Cut System. Sow at 40,000 to 42,500 seeds per acre (99,000 to 105,000 seeds/ha) to maximise output. Tested in new NIAB 3rd Cut Trials where long season varieties FAO 220+ have been tested on the best sites. Es Metronom achieved 6th highest yield in the trial series, which equates to 3t/ha above average in trial which is worth +£100/ha.
