

**NEW**

# ES AMAZING

**New high yielding biogas variety**

**Looking for a new biogas variety to drive performance?**

**Need high yields but an early harvest for contract grown crops?**

**YOU NEED Es AMAZING:**

 **High yielding variety in NIAB Pre DL trials 2017**

 **Highest potential biogas yield in German Biogas Sorten calibration 2016 harvest**

 **Very limited seed availability**

**Grainseed Ltd**

NEW

# ES AMAZING

## THE NEW VARIETY FOR BIOGAS PRODUCTION

### Cob Ripeness

Es Amazing has the potential to achieve huge yields on good maize land. Large cob with smokey grains at harvest.

Cob ripening days after Picker + 20.

### Maturity Group

Ideal maturity for the majority of maize growers. Large cob, typically 33 rings of grain with 14 grains per ring and good cob ripeness.

### Quality & Digestibility

ME

STARCH

Currently under NIAB testing.  
Highest potential biogas yield in German Biogas Sorten 2016.

### Plant Description

Very tall plant with a lot of prostrate leaves allowing more light to be captured. Good lodging resistance.

### Yield

18.5t/M/ha

106%\*

\* NIAB Pre DL Trials 2017

Sow at 40,000 to 42,500 seeds per acre (99,000 to 105,000 seeds/ha) to maximise output. Very high yields of forage in NIAB Pre Descriptive List Trials which mirrors performance in Farm Trials 2017.
