## FILL YOUR CLAMP

### Cob Ripeness

Excellent cob ripeness for maturity group coupled with large bulky plant combine to produce huge yields. Cob ripening days after Picker + 12

### Maturity Group

Legolas offers the grower a long harvest window from large stay green plants combined with exceptional grain maturity to maximise quality.

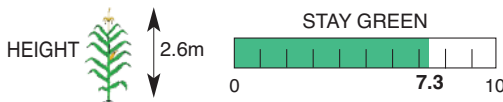

### Quality & Digestibility

\* FERA National List Trials 2016

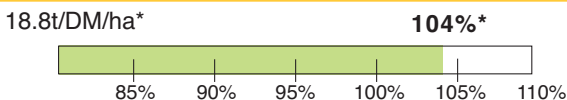

Well filled cob with a lot of grain. Typically 34 rings of grain x 12 grains per ring.

### Plant Description

Very tall plant with very erect, wide leaves offering the grower plenty of bulk. Well filled indeterminate cobs that sit mid height on the plant.

### Yield

\* FERA National List Trials 2016/2017

Sow at 42,500 to 45,000 seeds per acre (105,000 to 111,000 seeds/ha) to maximise output.

Excellent combination of cob maturity and bulky plant to produce quality, digestible forage.
