

HOBBIT

Have you got good maize growing land?

Or are you on a marginal site considering growing under plastic?

Want to achieve massive DM yields?

YOU NEED HOBBIT:

-  **One of the highest yielding varieties on the NIAB Descriptive List 2018**
-  **Potential for massive yields of Dry Matter – 105% controls**
-  **Exceptional early vigour**
-  **Suitable for Forage, Biogas Production and Drilling under Plastic**

Grainseed Ltd

HOBBIT

IMPRESS YOUR NEIGHBOURS, VIGOROUS AND MASSIVE

Cob Ripeness

Large indeterminate cob with large number of grain sites. Good cob maturity for a longer season variety. Cob ripening days after Picker + 19

Maturity Group

Good level of maturity in more favourable maize growing areas. Exceptional early vigour for the best possible start. Performs very well when grown under plastic on marginal sites.

Quality & Digestibility

ME

11.1

STARCH

27.4%

Very high ME yields 201,000 Mj/ha and 5.0t/ha of starch. Good cell wall digestibility of 56.7% which allows more maize to be fed. Well proven and consistent variety on good maize sites.

Plant Description

HEIGHT

2.6m

STAY GREEN

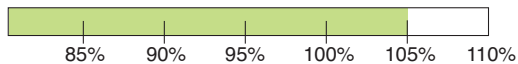

Very tall plant with lots of leaf bulk from very erect leaves. Cob attached low on the plant. Very good early vigour, grows quickly in the spring. Good drought tolerance on sands and gravels.

Yield

18.1 t/DM/ha

105%

Sow at 40,000 to 42,500 seeds per acre (99,000 to 105,000 seeds/ha) to maximise output. Potential for enormous Dry Matter yields. Suitable for Biogas Production or as a high yielding Forage on better maize growing sites. Shows same consistent high levels of yield when grown under plastic.
